Plan:

Problem List Items Addressed This Visit

None

Visit Diagnoses

1) infected boil continue with doxycycline wound was flushed with normal saline; pus was excised. Wound packed with sterile gauze and covered with 2 x 2 with tape Pt to avoid immersing wound underwater can change overlying gauze but not packing, follow up in 2 days for recheck, changing packing and dressing may need referral to general surgery once healed

No orders of the defined types were placed in this encounter.

I have used electronic speech recognition to prepare this document. The transcription errors which may arise from this process are unusual and can easily evade proofreading. For example, short words such as "not" may simply be omitted - completely changing the meaning of a sentence. Please beware such errors and do not hesitate to call me for anything which does not make sense.
